Tables:

Discussion

As of August 1, 2001, the Census 2000 data have not been adjusted for estimated net census coverage error based on the results of the Accuracy and Coverage Evaluation. That evaluation may result in changes to the data at a future date. Effort will be made to assure that the data presented with the Regional Profiles is consistent with the Census 2000 data.

On July 25, 2001, the federal Bureau of Census released, for New Hampshire, Summary File 1 (SF1). With release of this file, the first wave of Census 2000 data has been completed. The data released to date includes, by town, population data (including age group breakdowns), racial and ethnic data, and household data on a wide range of housing and family topics. There has been no release of income or poverty data as part of this first wave.

This section is intended to update the 1990 US Census materials used in the Regional Health Profiles. The tables and figures provided, however, are not full substitutes for the 1990 data as the Census 2000 SF1 provides only a portion of the data set needed to fully update the Profiles. The complete data set (SF3) will be released in mid-2002.

These tables and figures are only a sampling of the population and housing data that can be readily accessed by the public from either the US Bureau of Census or the New Hampshire Office of State Planning. These sources can be reached, via the Internet, at

- US Bureau of Census: http://www.census.gov/dmd/www/2khome.htm
- NH Office of State Planning:
  http://www.state.nh.us/osp/planning/SDC/NH2KCensus.htm

Census 2000 Supplementary Survey: Data from the Census 2000 Supplementary Survey was released in early August. The Summary Tables from this supplementary survey include economic, social, and housing characteristics. In this release, results are available for the United States as a whole, the 50 states, and the District of Columbia. The 107 tables provided for each of these areas present State-level estimates on a variety of topics, including income and wages, poverty, educational attainment and school enrollment, labor force information, and housing. This fall, similar tables will be released for most cities and counties with populations of 250,000 or more. The Summary Tables are available at:
  http://factfinder.census.gov/home/en/c2ss.html.

These State-level Summary Tables, when considered with State and HSA-level data from the Profiles, provides a rich context for considering local data and information.

The electronic version of the Regional Health Profiles (under "Newly Released" or "Planning and Research" at http://www.dhhs.state.nh.us) has links to these sites and also provides access to a Microsoft EXCEL spreadsheet that makes available, at the town level and by Healthcare Service Area, much of the data provided on the SF1.

Outline for this Section

The **Definitions** were taken directly from the Census 2000 Technical Documentation and include only those terms and words used in this section.

The **Race and Ethnicity** Table was copied directly from the Census 2000 Internet site. Additional data on a 'by town' basis is made available in the spreadsheet discussed above and at the Office of State Planning Internet site.

The **Population** Tables are provided by HSA and use the age groupings used in the Census 2000. Prior census data releases have included a 'by year of age' breakdown and, when available, that information will be added.

The **Housing/Household** Tables present, as noted, a portion of the currently available data. *The percentages are calculated as a percent of households*.

Definitions

Includes only those terms used in the population and household tables and figures in this Section.

Taken from <u>Profiles of General Demographic Characteristics; 2000 Census of Population and Housing – Technical Documentation;</u> US Census Bureau; May, 2000

Age — The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information.

Family Household (Family) — A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

Female Householder, No Husband Present — A female maintaining a household with no husband of the householder present.

Hispanic or Latino — People who identify with the terms "Hispanic" or "Latino" are those who classify themselves in one of the specific Hispanic or Latino categories listed on the questionnaire—"Mexican," "Puerto Rican," or "Cuban"—as well as those who indicate that they are "other Spanish, Hispanic, or Latino." Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

Household — A household includes all of the people who occupy a housing unit. People not living in households are classified as living in group quarters.

Householder — In most cases, the householder is the person, or one of the people, in whose name the home is owned, being bought, or rented and who is listed as Person 1 on the census questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder (i.e., Person 1).

Married-Couple Family — A family in which the householder and his or her spouse are enumerated as members of the same household.

Nonfamily Household — A householder living alone or with nonrelatives only.

Nonrelative — Any household member who is not related to the householder by birth, marriage, or adoption, including foster children.

Other Relative — Any household member related to the householder by birth, marriage, or adoption, but not included specifically in another relationship category.

Own Child — A child under 18 years old who is a son or daughter by birth, marriage (a stepchild), or adoption. For 100-percent tabulations, own children consist of all sons/daughters of householders who are under 18 years of age. For sample data, own children consist of sons/daughters of householders who are under 18 years of age and who have never been married, therefore, numbers of own children of householders may be different in these two tabulations.

Race — The concept of race as used by the Census Bureau reflects self-identification by people according to the race or races with which they most closely identify. These categories are sociopolitical constructs and should not be interpreted as being scientific or anthropological in nature. Furthermore, the race categories include both racial and national-origin groups.
The racial classifications used by the Census Bureau adhere to the October 30, 1997, *Federal Register Notice* entitled, "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity" issued by the Office of Management and Budget (OMB). These standards govern the categories used to collect and present federal data on race and ethnicity. The OMB requires five minimum categories (American Indian and Alaska Native, Asian, Black or African American, Native Hawaiian and Other Pacific Islander, and White) for race. The race categories are described below with a sixth category, "Some other race," added with OMB approval. In addition to the five race groups, the OMB also states that respondents should be offered the option of selecting one or more races.

If an individual could not provide a race response, the race or races of the householder or other household members were assigned by the computer using specific rules of precedence of household relationship. For example, if race was missing for a natural-born child in the household, then either the race or races of the householder, another natural-born child, or the spouse of the householder were assigned. If race was not reported for anyone in the household, the race or races of a householder in a previously processed household were assigned.

> **White** — A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as "White" or report entries such as Irish, German, Italian, Lebanese, Near Easterner, Arab, or Polish.
> **Black or African American** — A person having origins in any of the black racial groups of Africa. It includes people who indicate their race as "Black, African Am., or Negro," or provide written entries such as African American, Afro American, Kenyan, Nigerian, or Haitian.
> **American Indian and Alaska Native** — A person having origins in any of the original peoples of North and South America (including Central America), and who maintain tribal affiliation or community attachment. It includes people who classify themselves as described below.
>> *American Indian* — Includes people who indicate their race as "American Indian," entered the name of an Indian tribe, or report such entries as Canadian Indian, French-American Indian, or Spanish-American Indian.
>> *Alaska Native* — Includes written responses of Eskimos, Aleuts, and Alaska Indians as well as entries such as Arctic Slope, Inupiat, Yupik, Alutiiq, Egegik, and Pribilovian. The Alaska tribes are the Alaskan Athabaskan, Tlingit, and Haida. The information for Census 2000 is derived from the American Indian Detailed Tribal Classification List for the 1990 census and was expanded to list

the individual Alaska Native Villages when provided as a written response for race.

Asian — A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. It includes "Asian Indian," "Chinese," "Filipino," "Korean," "Japanese," "Vietnamese," and "Other Asian."

> *Asian Indian* — Includes people who indicate their race as "Asian Indian" or identify themselves as Bengalese, Bharat, Dravidian, East Indian, or Goanese.
> *Chinese* — Includes people who indicate their race as "Chinese" or who identify themselves as Cantonese, or Chinese American. In some census tabulations, written entries of Taiwanese are included with Chinese while in others they are shown separately.
> *Filipino* — Includes people who indicate their race as "Filipino" or who report entries such as Philipino, Philipine, or Filipino American.
> *Japanese* — Includes people who indicate their race as "Japanese" or who report entries such as Nipponese or Japanese American.
> *Korean* — Includes people who indicate their race as "Korean" or who provide a response of Korean American.
> *Vietnamese* — Includes people who indicate their race as "Vietnamese" or who provide a response of Vietnamese American.
> *Cambodian* — Includes people who provide a response such as Cambodian or Cambodia.
> *Hmong* — Includes people who provide a response such as Hmong, Laohmong, or Mong.
> *Laotian* — Includes people who provide a response such as Laotian, Laos, or Lao.
> *Thai* — Includes people who provide a response such as Thai, Thailand, or Siamese.
> *Other Asian* — Includes people who provide a response of Bangladeshi, Burmese, Indonesian, Pakistani, or Sri Lankan.

Native Hawaiian and Other Pacific Islander — A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. It includes people who indicate their race as "Native Hawaiian," "Guamanian or Chamorro," "Samoan," and "Other Pacific Islander."

> *Native Hawaiian* — Includes people who indicate their race as "Native Hawaiian" or who identify themselves as "Part Hawaiian" or "Hawaiian."
> *Guamanian or Chamorro* — Includes people who indicate their race as such, including written entries of Chamorro or Guam.
> *Samoan* — Includes people who indicate their race as "Samoan" or who identified themselves as American Samoan or Western Samoan.
> *Other Pacific Islander* — Includes people who provided a write-in response of a Pacific Islander group such as Tahitian, Northern Mariana Islander, Palauan, Fijian, or a cultural group such as Melanesian, Micronesian, or Polynesian.

Some Other Race — Includes all other responses not included in the "White," "Black or African American," "American Indian and Alaska Native," "Asian," and the "Native Hawaiian and Other Pacific Islander" race categories described above. Respondents providing write-in entries such as multiracial, mixed, interracial, or a Hispanic/Latino group (for example, Mexican, Puerto Rican, or Cuban) in the "Some other race" category are included in this category.

Two or More Races — People may have chosen to provide two or more races either by checking two or more race response check boxes, by providing multiple write-in responses, or by some combination of check boxes and write-in responses. The race response categories shown on the questionnaire are collapsed into the five minimum race groups identified by the OMB, and the Census Bureau "Some other race" category. For data product purposes, "Two or more races" refers to combinations of two or more of the following race categories:
• White
• Black or African American
• American Indian and Alaska Native
• Asian
• Native Hawaiian and Other Pacific Islander
• Some other race

Coding of Write-In Entries — During 100-percent processing of Census 2000 questionnaires, subject-matter specialists reviewed and coded written entries from four response categories on the race item — American Indian or Alaska Native, Other Asian, Other Pacific Islander, and Some other race – for which an area for a write-in response was provided. The Other Asian and Other Pacific Islander response categories shared the same write-in area on the questionnaire.

Spouse — A person who is married to and living with the householder. This category includes people in formal marriages, as well as people in common-law marriages.

Population by Race and Hispanic or Latino Origin, for the Counties and 15 Largest Cities and Towns in New Hampshire: 2000

NOTE: Data not adjusted based on the Accuracy and Coverage Evaluation. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see http://factfinder.census.gov/home/en/datanotes/expplu.html.
